AutoCAD provides two-dimensional (2D) and 3D CAD features. It allows drawings to be placed on construction-ready blueprints called sheets. AutoCAD uses coordination geometries and includes dimensioning tools. To draw wireframes for structural elements, AutoCAD uses splines. AutoCAD has comprehensive functions and tools for 2D drafting and 3D drawing. Drawing Work area A workspace in AutoCAD is called a draw area, usually having the name of the file used for the drawing. Drawings may be placed on sheets, and these sheets are stored in a library. The current drawing is called the active drawing. A drawing is part of a group of drawings that share a coordinate system and typically a common library. Some applications and files allow multiple drawings to be open in a single application. A library is a collection of drawings. When a drawing is saved, a unique library name is given to the drawing, and it is placed in a particular location on the computer hard drive. The user can also create a new library from a set of drawings. Drawings in a library can be opened and closed. Drawings can be drawn in horizontal or vertical paper orientation. A drawing can be placed on a page, named, and then moved to a new location. The location is designated by the page number and the sheet number, which can be named and placed. A sheet may be placed on a page, named, and moved to any other sheet of the same library. A sheet can be given a name and be located anywhere on the drawing. Page and library management Page and library management (PLM) is the manipulation of paper and electronic storage for drawings. A paper storage location is a storage site or area for a drawing on paper, such as a large cabinet. Storage locations can be inside or outside the building and can be locked or stored unlocked. A paper storage site can be designated as a private site or as a shared site. A shared site is a site where multiple users can draw simultaneously. A private site is a site where only a single user can draw. A library storage location is a computer memory location where a drawing is stored. A library can be located on a computer hard drive or on a network server, such as a file server. Drawings can be printed from the computer, or a portable computer (laptop, tablet) or electronic portable storage device (SD card)

Click on image for larger version in a separate window. (or scroll down for photos of the behind-the-scenes effort to film the craft.) What Is 'Spaceward Bound'? Spaceward Bound is a real-time documentary/virtual reality experience for the first American spacecraft to explore the distant reaches of the Solar System - NASA's Voyager 1 and Pioneer 10. Because the spacecraft are now at the fringes of the Solar System, we can see them as they traveled away from the Sun as the only traces of their existence. This is a rare opportunity to be there as the Voyagers are traveling through the last of the outer Solar System. This interactive experience lets us see space the way the Voyagers saw it - complete with stunning images of Saturn, Jupiter and the intricate details of our home planet, Earth. From The Museum of Flight's website: The Voyagers are the first spacecraft to explore the outer limits of the Solar System and what they've seen during their travels has already changed our understanding of the solar system. They've photographed the ringed planet Saturn and Jupiter's moons and captured some of the most stunning images of our planet Earth. They've tasted the ice and atmosphere of Jupiter's moon Ganymede. As they approach the border of the solar system, they've discovered the subtle changes in the composition of the interstellar dust that surrounds us. They've shown us the wonders of interstellar space. Both ald647c40b

New England Patriots tight end Rob Gronkowski said he's playing "to the best of my ability" at this point of the season, but admits he's not the player he was last year or in 2012. The Patriots (4-3) have struggled offensively this year and are averaging just 23.8 points per game, second-fewest in the league. They've had problems executing all season, but they're hardly alone. Six teams average fewer points per game than the Patriots. "It's a work in progress," Gronkowski said. "We definitely have to find a way to score more points. It's an issue right now, and I feel like we're not doing a good job. We're trying to get it fixed." Gronkowski, who had seven catches for 77 yards and a touchdown in the first half of Sunday's 38-27 win over the Tampa Bay Buccaneers, was asked if the offense was suffering from a lack of leadership and play-calling. "It is," he said. "It's not
