Comments: We can't find any alternatives to this eBay App?The main change is in the menu, which features an expanded series of essays, "Coffee and Conversation." One of the weirder tenets of college life is the idea that you can't learn anything from a class you have to "take" with a professor (but of course you can) — by writing a work of literature or attending a museum — so you have to take the class with a teacher from another field. Working with a professor from an entirely different subject is the perfect way to form a quick study group, and writers often benefit from the conceptual freedom and practical support of working with a literary scholar. Another useful feature is the book-club-like discussion board on the website. The group is still small, but it has already hosted some lively discussions about Joshua Glenn's "A Short Guide to a Happy Life"
