What's New in the Calculator.NET?

Calculator.NET is a professional desk calculator that can be used to solve complicated math problems quickly, accurately and easily. Whether you need to

perform basic arithmetic, find mathematical formulas, or even solve a complex optimization problem, Calculator.NET has you covered. Made for professional use, Calculator.NET was specifically designed to easily calculate performance parameters and statistics on web pages. For example, you may see the following display on the

calculator window while determining average times for a website to load:

1-minute:	5,132 ms
5-minute:	16,826 ms
15-minute:	72,844 ms
30-minute:	256,920 ms

After determining the page load time statistics, you can copy the data displayed by pressing the Copy button.

1-minute:	5,132 ms
5-minute:	16,826 ms
15-minute:	72,844 ms
30-minute:	256,920 ms

Built-in "Copy the data to clipboard" feature will help you copy any data from Calculator.NET to any compatible application such as Excel, Word, PowerPoint, etc. Easily create and save any calculations made with Calculator.NET to a text file or print them out. To do so, double-click on the cell you want to save or print and hit the Print or

Save button to send the data to your desired location.

Calculator.NET is a simple yet powerful calculator written using C# language for Windows. It is freely available on Microsoft's web site and comes pre-installed on Windows XP systems. Although there are many other calculators on the market, Calculator.NET is

designed to be light and compact in both system memory and disk storage. Calculator.NET works with floating-point numbers, if you know how to solve math problems. Don't forget to add the "using System; namespace Calculator;" and "using System.Drawing;" statement to the file. Calculator.NET has an elegant look and allows for numeric

calculations on any device with a numeric keyboard, including a mobile phone with a touch-screen.

Displaying your work is as simple as pressing the OK button. Our impression is that Calculator.NET is developed by a good programmer with a minimal budget. As for the functionalities, Calculator.NET has you covered. The following

list is a short selection of features and options:

- Add, subtract, multiply or divide up to 18 significant digits.
- Support for complex numbers
