Characterization of inositol trisphosphate receptors of rat cerebellar microsomes: in vitro effect of inositol 1,4,5-trisphosphate. The in vitro effect of inositol 1,4,5-trisphosphate (InsP3) on Ca²⁺ release from rat cerebellar microsomes was examined. InsP3 induced a concentration-dependent increase in [32P]inositol phosphate accumulation, and a corresponding increase in 45Ca²⁺ release from prelabelled microsomes. The concentration dependence of the response to InsP3 was similar to that reported for cerebellar type InsP3 receptors on the basis of classical InsP3 receptor binding assays. However, unlike other subcellular fractions reported to contain InsP3 receptors, microsomes exhibited a high basal level of inositol monophosphate accumulation. Under Ca²⁺-deficient conditions, the concentration dependence of the response to InsP3 was unaffected; however, the basal level of inositol phosphate accumulation was reduced. The effect of InsP3 was also examined under conditions in which the physiological potential for inositol phospholipid breakdown is uncoupled from InsP3 receptor activation. In these conditions the basal rate of inositol phosphate accumulation was independent of the presence or absence of InsP3, and the concentration dependence of the response to InsP3 was unchanged. These results

Q: Implementing a simple COde Runner in Python This is my first Java class. I want to test the program with a simple condition, but my coding is not very good. I know I need to use strings and strings in conditions. But how do I use one string, multiple times? import java.util.Scanner; public class COdeRunner2 { public static void main(String[] args) { String myCard = ""; boolean result = false; Scanner in = new Scanner(System.in); if (myCard.equals("Java")) { System.out.println("This is Java"); result = true; } else if (myCard.equals("Python")) { System.out.println("This is Python"); result = true; } if (!result) System.exit(0); } } A: You should move that out of the loop. if (myCard.equals("Java")) { System.out.println("This is Java"); } else if (myCard.equals("Python")) { System.out.println("This is Python"); } else if (myCard.equals("Other")) { System.out.println("This is Other"); } }
