Effectopedia is designed for studying and understanding adverse outcomes in the fields of health science and chemistry. While some people might find its features, and its use, disturbing, the same cannot be said about the program itself, which is very easy to use. Effectopedia is indeed an application that can be used by all and it can be used in all scenarios where the need for researching and understanding adverse outcomes arises. However, it is worth noting that, as a computer-based program, Effectopedia may require the installation of a certain amount of software, some of which may be provided by other software providers. How to view pathways In order to visualize the adverse outcomes in a pathway, you must first click on the "View" icon. In the resulting window, click on the "Pathways" tab. Once you've done so
