The Dark Knight Rises, the last film in the trilogy, was released on July 20, 2012. [Note: All film credits. Also: A trailer featuring David Bowie that looks like he's about to become an icon has surfaced online] It will certainly be one of the biggest superstars of this year (and definitely one of the most anticipated). The movie has already received some reviews, which is pretty good considering it comes just a day after it premiered. Many people have already watched the movie and they found it good with some changes that made it even better.
