Click Internet Options on your browser's top tool bar and then click on the security tab. Apr 14, 2020 . Internet Explorer 11 needs a plugin like ActiveX to play video. You may need to add ActiveX Filters to your internet browser for the video to play. But this is just a guess. It used to work back in the good old Windows XP days. This is a major security warning. We recommend that you turn off ActiveX Filters as it may interfere with legitimate ActiveX code and that may cause security problems. When you upgrade to the newest version of Internet Explorer, no matter whether it be 11, 12, or 13. Internet explorer is automatically updated, IE 11 is running the latest version of ActiveX as it is in almost every computer now. But it's not the same as if you're using Windows 7 or Windows 10. If the action is disabled, I then set the security to the lowest and it still does not work. .exe I have to open the browser and then right click on the active x and then click
