Latest Features:...The present invention relates generally to surgical instruments and, more particularly, to surgical instruments for use in laparoscopic procedures. Laparoscopic or minimally invasive surgical procedures have recently become more widely accepted. These procedures are characterized by a number of narrow tubes or cannulas inserted through small incisions or openings in the body. Surgeons may directly manipulate organs or tissue through the cannulas, for example, and perform procedures that would otherwise require more invasive procedures. Various embodiments of instruments for performing minimally invasive procedures are disclosed in U.S. Pat. No. 5,947,971, which issued on Aug. 31, 1999 to McEwen for xe2x80x9cAn Endoscopic Manipulating Instrument,xe2x 82138339de
