Metacafe Screenshots: Pros + Fast and effective downloads Cons – Still too expensive All I can say for this site is that you really need to know what you are looking for on it. All the videos are geared toward the same thing so it's hard to find videos that you like. I really like the videos that you put on my email though. I really like it. I am a big fan of Metacafe. I've had it for a few years now and it never crashes and seems to work just as well if not better than Netflix. I have it with my television, my laptop and my iPhone. I highly recommend Metacafe. I discovered a friend's video on there while I was on vacation and so I loaded it on my phone to view while I sat on the beach. I would say that it's just what you'd expect from a website like this. The videos are good and they're pretty entertaining to watch. The site itself is pretty simple to use and it's very intuitive. You have to register to use it though. If you have ever had to register for anything like this, you know that the username and password and email they send you is nowhere near secure and it's definitely not worth your while to give them your information. I decided to download and see how the site worked and I was surprised at how easy it was to use. I never thought I would have this much fun by just watching TV or movies, but when I watched my friend's videos on it, I just had to find out more about it and have it installed. It worked perfectly for me and it's actually really good. I don't know how they get the videos onto your computer, but I'd imagine it's through the Internet, and this may mean that the quality will be a little lower. However, if you don't mind this, then you'll really enjoy watching videos on Metacafe and it will definitely make your life a lot easier. Pros + Fast and effective downloads Cons – Still too expensive Overall, it's really a good site for me. I
