---

point I decided that I needed to create a game that would get more attention than "The Darkness". As such, I developed Metro Last Light Redux. I knew that most people would be playing the game in

---

windowed mode, so I created the game with high-quality settings to fit that window. As such, I set the game to use a high-resolution framebuffer, use a modded Microsoft DXT texture compression, use a high-

---

quality VBO instancing,  
and use the latest Nvidia  
PhysX. For audio, I use  
the latest OpenAL. Once  
I released the game,  
people asked me if I  
could tweak the game for  
better performance. I  
started playing with the

---

game, and noticed that many of the settings could be changed and tweaked. As such, I created this tweak tool to make it easier for users to change their settings for Metro Last Light Redux. I have included all of the

---

settings that are possible to change with this tool. It also allows for the options to be saved for easy access. I hope you enjoy using this tool!
