ArMA 3 (known as "Arma 3" in various countries) is a first-person shooter developed by Bohemia Interactive, and is the fourth game in the ArMA series. It was released on September 28th, 2010 in the standard version, as part of the widely popular Total War series of games, and is the second game that was developed by the co-founders of the franchise. The game is a further development of the 2007 title ArMA II: Operation Arrowhead, and expands on its gameplay and design concept. Gameplay Game play and design changes: The New Gameworld: Arma 3 is the first game in the series to take place in a large, modern map with multiple variations in space, terrain, and climate. This map was created by the developers as a "scenario sandbox", and is based on the game world they intend to use in further game expansions and spin-off titles. The game features a detailed physics engine to simulate every aspect of the game world, including vehicles and weapons. The advanced physics allow the game to feature a more complex sandbox environment, and means the game will run consistently on any computer of sufficient performance. The improved gameplay: The game has also made improvements to the gameplay; while the game features similar mechanics and components to the previous game, it includes new elements and ideas, including realistic weapon damage, destructible environment, and new squad gameplay mechanics. The game also features a static time-line, allowing multiple scenarios for the same map to take place with multiple troops and weapons. Finally, the game features major improvements to the interface, allowing the player to gain a greater depth of information in the in-game map. Plot Arma 3 features an alternate history of the 1950s, where the Cold War does not end until 1990, and the Soviet Union continues to exist. The Soviet Union has defeated the other Warsaw Pact countries and now possesses the world's only nuclear arsenal. The now-superpower Soviet

Union enters the Third World War against the United States, after a grand invasion of Western Europe and the Middle East by the Warsaw Pact is defeated by a U.S. backed campaign of covert and special forces operations. In the aftermath of the war, the major Western European countries rely on Soviet support. Russia and its allies thus join together and proclaim an entity called The All-Union People's Council, taking over the United States' military bases and taking command of the various airfields and installations. The United States has to form a resistance 570a42141b
