

Note: if you find my website is not updated immediately, please refresh or try another search term. Thanks A: Both uTorrent Pro and uTorrent can connect to trackers from within the application. Check the addon browser in uTorrent. The uTorrent pro addons can be downloaded and installed manually. Steps: Install addons from the first page of the plugin Browser. Open the plugin uTorrent Pro. Make sure that the uTorrent Pro addon is enabled. Connect to a torrent file. Wait. Your browser should be informed about a download initiated by the addon. An addon is an optional extension to uTorrent that can automate certain tasks without the need to start another application. Examples of uTorrent Pro addons include proxies, proxies, mp3 uploads, magnet linking, ad blockers, down/up speed limiters, cd rippers, video converters, screen recording etc. Utorrent Pro (2015+) : User reviews from the addons browser Pros Very good performance. Control over the process (stop the torrent) Ability to filter individual client comments Ability to select the public tracker from which the torrent is sharing Cons Some versions of the plugin aren't up to date on the latest versions. NOTE : uTorrent Pro (2015+) is only compatible with uTorrent. Magnet links Magnet files allow magnet links (magnet:) to be automatically processed by uTorrent Pro. These links are the "magnet urls" found in the trackers list. For example, magnet:0.1.torrent This is a normal magnet link. magnet:tracker-list-uri?info_hash=b33286e7e11f54dfa7e35a7cc67327f4&name=Awesome%20Torrents%20Tracker%20List This is a magnet link with more information. What you should know : You must have the uTorrent Pro addon enabled in uTorrent. Here is a link to the uTorrent support page. If you can't find "Add new" in uTorrent Pro, download the addons. uTorrent Pro Addons page : uTorrent Pro Addons Magnet links (DLG section):
