
X-force Inventor CAM 2016 Portable !EXCLUSIVE!

A pinhole camera is a simple camera without a lens, but with a tiny aperture (called a pinhole) - essentially a light-tight box with a small hole in one of them. In its simplest form, a camera obscura does not have a lens, but it can still be made to show an image with a tiny hole in one of its parts. For example, using cardboard or a sheet of paper stretched over something like a frame, you can make a simple camera obscura that works on this principle. The lens of the pinhole camera will consist of a small lens stretched over one side of cardboard (or paper), and there may be more than one lens.
