Link.Q: Finding a continuous and bounded function that attains its
infimum Let u be a nonnegative measurable function in the whole
 \mathbb{R}^n that only assumes the values zero and infinity. Let
 $M = \inf_{x \in \mathbb{R}^n} u(x)$. Find a continuous and
bounded function f with the property that
 $\lim_{x \rightarrow \infty} f(x) = +\infty$ and
 $\lim_{x \rightarrow -\infty} f(x) = -\infty$. (this problem from the book
"Analysis" by Kreyszig) The first idea i got is to use the Cantor-
Schröder-Bernstein theorem. So to prove the existence i have to find
a continuous and bounded function g and a function v such that:
 $\lim_{x \rightarrow \infty} g(x) = +\infty$ and
 $\lim_{x \rightarrow -\infty} g(x) = -\infty$. Then $g+v$ satisfies the
conditions of the theorem. But it does not really worked well as it is a
variation of the Schauder theorem. So what if the functions I try to
find are not bounded? Thank you in advance, Mateusz A: The required
function f can be obtained by a selection in the following way. By
the definition of M , for every $\epsilon > 0$ there exists $R > 0$ such
that $M - \epsilon$ be a real number such that $0 < M - \epsilon < M$
