The A360 APIs can be used for data conversion and file format conversion between CAD systems. In addition, the ACR APIs support the AutoCAD API for faster and better PDF/JPEG creation, file format conversion and other features. The conversion process is currently a one-way process, from PDF to DWG (and vice versa), but the ACR API (AutoCAD API for Quick Reporting) will allow bidirectional conversion. In the ACR API, the conversion feature can be used to dynamically construct PDF/JPG reports from DWG drawings. AutoCAD can read and write in the AFP (advanced file protocol) standard. Since the release of AutoCAD 2008, there have been multiple CAD vendors, including: Parasolid, BREON, Redline, Topcon's Tekla Software, FLEXstudio, Autodesk's SolidWorks, ANSYS, PTC's Mirage, and Zeiss' Creo. In 2017, the IDC, a market-research firm, predicted that the CAD market would grow from \$23.1 billion in 2016 to \$27.5 billion in 2020. Since 2016, the free version of AutoCAD is supported only on Windows 10, as of the release of AutoCAD 2019. It requires either Windows 7 or 8 (with compatibility layer) for installation.
