Clearing your browsing data is important from many perspectives. It helps your browser breathe and work faster and better, it helps you be more organized and it also helps people get rid of more intimate stuff when they've got prying eyes around. That's why Clearing Browsing Data for Firefox is an extension you should consider getting. It functions very well, and it will definitely be of use once in a while. It might not be innovative, but it is useful. You must agree that an extension that deletes your browsing data is not really something that will take you aback. Quite the contrary, it's avoidable, mainly because your browser has the same function integrated. The only advantage to using this extension is you don't have to waste time remembering where that particular setting is situated in your browser. It's a simple 2-step process with this add-on.

Click and delete. This is all you have to do to put your browser back on its feet. The interface is simple, yet complete. If you've already accepted this extension as a necessity, the next thing worth mentioning is the menu displayed when the icon is clicked. You get to choose what you want to delete. You can clear the whole of your browsing data or piece by piece, including cookies, history, cache, form data, and downloads. Additionally, you can decide on the time range you want to apply your cleaning for. It can be for the past 30 minutes or since the last time you cleaned your browsing data, the choice is yours. Clear Browsing Data is an extension worth grabbing if you use your browser quite often and do not regularly delete your data, for whatever reason. With this add-on, clearing your data will become a piece of cake. Simply select from a drop-down list what you want to remove, and

presto, watch as your browser recovers from its slumber, and your life along with it. Read the rest of the review... Read the rest of the review... Read the rest of the review... Three months ago I wrote a review of WOT Adblocker, [\[link widoczny dla zalogowanych\]](#) and I mentioned I was to write a review of the extension that can go further than the one mentioned in the previous article. I'm happy to say that my expectations were met, and that this is a very good extension. What is important about this extension is that it offers users a way to "learn", by choosing one option or another in order 3a67dffeec

Description: DigiBlaster is an add-on to WYSIWYG HTML editors (like CKEditor, TinyMCE and/or FCKeditor) that converts WYSIWYG editors to WYSIWYM editors. You can quickly enable a toolbar button to copy plain text from the editor, to the clipboard, or to download the HTML code as plain text. You can also add line breaks and images directly into the text editor, too. Description: Graybox is a jQuery plugin to create a modal dialog box that is centered in the page and fill the entire browser window. It is simple and fast to implement. Since we needed to use several of the Graybox features in a recent web application we wrote a little JavaScript to install in all browsers including IE8. See [How It Works](#) for more information. Description: WYSIWYG (What You See Is What You Get) Editors Are Now a Thing; While this is good news, that

means you have a lot of text you can write, but not a lot of tools to get your text in the form you want it. Styling controls are a big problem. I wanted a styled text editor that allowed me to write in a style that I didn't have to think about; I just write in Markdown then apply the styles when I get around to converting it.

Description: FieldTrip is a tool for recording and analyzing multi-channel EEG/MEG/ECG/EOG (electroencephalography, magnetoencephalography, electroencephalography, electrooculography, electrophysiology, electrocorticography, electrocardiography, electrocardiography) data in MATLAB, EEGLAB or EEGDSP format. The aim of the FieldTrip toolbox is to support researchers as well as developers in the field of signal processing, allowing for the creation of novel analysis tools. In

particular, FieldTrip provides a collection of tools for data pre-processing,
