Samurai Riot - the board game where you play against 5 other samurai! But this is a war like no other, as you play in a wagering duel in the middle of an ancient battlefield. But this battlefield is not real. This is a wild fantastic land, populated by mythical beasts of lore and legend, and your opponent is a video game bot, which takes every move, every gamble, and every risk you make, although that's not the point. It's not about defeating your opponent. You're not fighting to win, you're only fighting because you're a samurai. Features: - Game with a unique blend of board game and video game. - 2 Board Game modes: - Entering the battle with only the basics, or - Starting from scratch, building your economy and character out - 4 different paths where you can specialize in: - Strong, fast, or both? - Damaging, meaty, or both? - Build yourself a reputation as a gambler, or a tank - Or build yourself as a Zen Monk, a Pious Gnome, or an Iron - 5 different types of characters - 10 different types of mythical beasts - Unique special features like the Potion Shower, or Unique possessions like The Skull and The Moon - One special rule: you can go into overtime if you win by 4, and also win if you draw! - From the earliest of ages, Samurai have fought in open warfare, in single combat to prove their worth. Not a single Samurai was ever a politician, an artist or a writer. Only one thing has been important to a Samurai: Strength, Speed, and Skill! If you really want to relax, you can play with dice or by flipping a card instead of playing the board game. If you want to play it differently, the battle can be played a different way. You can enable or disable the special cards, which influence the battlefield, as well as the special characters. You can even change the order of the cards in the deck! The game mechanic of the game is a wagering duel, where you gamble your points in order to give yourself an advantage in the game. If you win, you receive a point bonus, and if you lose, you lose your points. As a result, you need to be careful, or you'll lose a lot of points, and

About Valvarian's Initium'

Valvarian's Initium is the continent of Dredmor. The lawless tribe of Berserks live in the wilderness between the frozen fjords of the north. Even they find it difficult to survive out in the open with each other. The most dangerous predators are the Beastkin, a brutal mix of Birgus, Witchlords, Viking, and Lizardmen. Beasts prefer to flee to the north. No one passes the Giant Golem, the most dangerous predator of the northern sea,

The aim of this game is to eliminate all the enemies, to survive and to get a high score by killing all the enemies and get a new weapon. There are lots of weapons in the game. There are many maps and many enemies. Weapons in Game:

- Ranger:It is a really good weapon. The ranger has a long reach, because it can kill enemies if you aim well, but the reach is not enough to kill enemies from a distance of more than 3 meters.
- Micro submachine gun:It has a short range and isn't a good weapon, because you can't kill enemies from a distance of more than 3 meters, but it has very high bullets!
- Flamer:It has a very big reach and a very high damage, but the range is very short.
- Ordinary Shotgun:It's just another ordinary gun.
- Rocket Launcher:It has a big reach but low damage and it fires very fast.
- Rocket Launcher:It has a big reach, but a very low damage.
- Ripper:It has a bigger range than the Micro submachine gun, and it can kill enemies from a distance of more than 3 meters, but it has very low firepower.
- Instinct:It shoots a big circular ray that destroys all enemies in a radius of more than 3 meters.
- Gale:It has a very big damage but a low range.
- Plasma rifle:It has a very good range and high damage, but it has a quite big clip capacity, so the weapon will be emptied after 6 shots.
- Flash Grenade:It has a big range and high damage.
- Axe:It has an average range and average damage.
- Experimental rifle:It has a high DPS, but a short range. It also has a reload limit.
- Remote Sniper Rifle:It has a big damage and a big range.

You start the game on the map Crater, and all you can do there is to kill all the enemies, to eliminate them. When you kill the first enemy, you are given a new weapon, a level 1 weapon, and you can upgrade your weapon to another level. After you finish eliminating all the enemies, a new level is opened and you get a new weapon and a new level. The ending of the game depends on your final score and how much you got. You

version of the NVIDIA Driver should be used. • **Install the latest version of DirectX** • **Basic knowledge of the keyboard and mouse is required.** For the last week I have used DarkBASIC (or something like that) and created a very simple game; a space battle sim. I thought I would share with you the game and let you know that although it is not great, in the last week I was able to learn a lot about game design, in particular game programming and maps. If anyone is looking to create a nice space simulator with graphics, I would definitely recommend this software. It really helped me! Thanks for reading! Originality: I think that this game is interesting in two ways: the mechanics and the art. This game's mechanics are quite complex and it can be compared to Final Fantasy X where you take control of your character with the use of the D-Pad and use your basic weapons and special attacks. However the thing that makes this game unique is that it really looks like a SciFi game, especially in its graphics. I hope that you enjoyed reading this! Game concept and development: If you are a developer you will know about the concept of the plot, you will know about the concept of the main character and you will know about the idea of the enemy. In this game I used many ideas from Final Fantasy X and Chrono Trigger. This idea is that your main character does not look like this one: Instead he is really thick and wears a hat with a propeller on it. You are controlling him in a space-ship in an environment of different planets that have beautiful vistas and you have to kill enemies while saving survivors from a bigger enemy attack. The first moment you play the game is when you use the space-ship's jump function. This
