```
codigo de activacion para brainsbreaker 5 176 codigo de activacion para brainsbreaker 5 176 here is my code. public static String readAllFile(String path) { StringBuilder b = new StringBuilder(); try { FileInputStream fis = new FileInputStream(path); DataInputStream dis = new DataInputStream(fis); BufferedReader br = new BufferedReader(new InputStreamReader(dis)); String line = ""; while((line = br.readLine()) != null) { b.append(line); } dis.close(); } catch (FileNotFoundException e) { e.printStackTrace(); } catch (IOException e) { e.printStackTrace(); } return b.toString(); } A: Use String.substring to get the single quotes out of that ugly looking String. You could try using a regular expression: String pattern = "^.+\\r.+\\r\\s*(.*)\\s*$" Matcher matcher = Pattern.compile(pattern).matcher(input); String singleQuote = matcher.group(1); This will work for the first line that contains the quoted text, but won't account for other lines that don't have quotes in them. If you wanted to be more clever you could try something like this: String pattern = "^.+\\r.+\\r^[^\\r]*[\\r]"; Matcher matcher = Pattern.compile(pattern).matcher(input); String singleQuote = matcher.group(1); String quote = matcher.group(2); You are here Newsletter You are here In partnership with our generous sponsors, The Middletown

Calculate Risk Factors Health care costs account for roughly 15% of gross domestic product, based on a 2008 forecast by the Organization for Economic Cooperation and Development. This cost has risen in recent years, particularly for physician services. These costs are expected to increase by about 3% a year, or \$1.9 trillion, through 2030, as the population ages and as people live longer. Americans are one of the only countries to have seen such large increases in health care spending in recent decades. Spending on health care in the United States is also much more concentrated than other developed nations. Of the nearly 17 million uninsured Americans, 10 to 15 million have ins
