Description: Futari is extremely sophisticated and probably the most attractive game ever made. It comes equipped with sound and vibrant graphics, along with solid gameplay. There are many ways to alter the game's gameplay and the options are scattered all over the control panel. There are still a couple of enhancements you need to add to your game. The game will display that you have **No Powers** stated and when you do buy sonofizzy skin you get a **Nomic Halo** that ranges from 0-2. The more the number the more the hazzards.

The **Special Effect** Value determines which of the 12 options you get. Think of it as a key for the controller. Generally a 0 is fine. Playing during a **Rainy Day** will yield some difficulty, while playing during a **Perfect Day** yields a **No Damage**. Note that an **Awaiting** will fall into the **Perfect Day** category.

The **Special Animation** value is similar but it will change the animation values in the game. So if you want to play the game more speedily you get a value of 0. If you want a slower paced life you have a value of 6. For the most part the values alternate.

There are a number of **Hints** provided and if you get stuck you can access this information and adjust your gameplay if you desire.

A kind of a tireless explorer, Sergey is always on the lookout for new stories to tell. In the past, he's developed such games as Too Many Secrets 2, Olympus no Kiseki, and Big City. Great game. Nice storyline. Just what I was looking for while playing in a plane. Didn't wait for the second part to play it, so I discovered later that there is the first one too. I didn't find some bugs, but certainly will try to report them if I find out about them. But one thing that bugs me: I had 12 Titans in the first part and an extra two in the 2nd. Would it be possible to take them out? Well, it doesn't change much for my gameplay, but these things are still bugs. It's great game with nice storyline and atmosphere. My only problem is that controls are a bit too clumsy. You have to avoid enemy and if you try to use some of powerups you immediately appear on the other side of the level, where it is impossible to continue current level. It is good game. There are few very short stages, but it is fun to play. It also has great storyline c9d1549cdd
