This article describes a systematic process of knowledge translation, using the Ottawa Model for Knowledge Transfer, Implementation and Sustainment, to integrate nurse researchers in an ongoing nursing research project with practice collaborators. The lessons learned are discussed in the context of the integrated knowledge translation framework, highlighting the importance of maintaining flexibility and addressing gaps in knowledge translation. All participants agreed that the program was successful, and they would like to participate in similar programs in the future. They suggested that the program was successful because of

---

a number of factors: strong collaboration across practice and research partners, strong support from senior leaders, in-depth knowledge translation training, ongoing peer support, and the use of strategies that focused on increasing the context of knowledge translation in practice settings.Q: Active Reports:
