Philosophical reflections on the fate of embryos and offspring of wild animals are raised in this paper. I will argue that there are issues about the use of animals in laboratory science that are similar to issues about the use of embryos and offspring. In particular, the fate of animals in laboratory experiments may be uncertain, and, in the case of the latter, this may lead to an ethical dilemma. It is then argued that the case of embryos and offspring is further complicated by the fact that they have not yet achieved a state of being-the-embryo/offspring is not yet alive. I will conclude by raising a series of questions and leaving them open to further discussion.Польская пресса опубликовала перепись политологов по итогам конгресса по внешней политике. I have noticed the Ron/Hermione picture I did recently has been used as the Ron/Hermione background in Harry Potter and the Deathly Hallows Part 1 but then again, I think as much as I love my own art and feel like it should be showcased for others to enjoy, you can't make it up, either. I started off this piece with a picture of the back of my art board and I drew in the background, a scene I felt would be appropriate to include and then added the characters. I don't have that many of Ron and Hermione together so I did Harry in his life vest as a boy (when Ron wanted to join) and then Harry and Hermione at the end of the book. I didn't make any artistic decisions about this. It's just what I did and didn't do in the picture. I don't really like the finished product of this picture because I'm still not satisfied with it. It's very childish and at times, I feel it looks like a photo instead of a drawing or pencil and ink piece. I need to get better at drawing Hermione
