When it was shown at E3 2017, the game seemed to be far too difficult to even be realistic. Although things have gotten a little more realistic since then. The new animations look very good. The new facial animations look good, but the player models looked weird. This is probably the game that many people will remember when they think about FIFA. It took the series back to the good old days when kick off games were pure chaos. How this game handles possession feels different, the tackling is all over the place, and the shots and the crosses look much less tame. It is a massive leap forward in the series. FIFA 21's gameplay was improved, but it didn't change as much. But for those who also came to this series in a time when most people were playing FIFA, FIFA 22 is a much needed renewal. I can't wait for it to come out. No, I'm not scared. 22. Start levelling up your favourite player, and kit them out with the best players and the best kits
- **BETAMOMETER** The BETAMOMETER uses a technique called Time-to-Impact to calculate a player's physicality, dribbling and passing skill in real time. Use the system to predict future events and make smart decisions.
- **DEVELOPMENT PEGI** leads the charge for all game development, as the ESRB and PEGI work together to create more accurate content descriptions for every game on the market.
