"Our names are Nyanza and Maple Leaf and we met on the road on our way to Santa's Secret Shopper Store." Looking to exchange the ordinary for the extraordinary, you seek a life of adventure. There's an entire fairy tale behind this unique duo. Are you ready for a tale of mystery and magic? Plunge into the vibrant world of the Kitaria Fables!

----- Nyanza - She is a powerful fairy who grows fatter, wilder and more mischievous every day. Always entertaining herself by touching a piece of candy candy, the giant candy cane has also gained incredible power. It's an enchanted being. There are times when something happens to her that she can't handle. A candy cane can't help it. ----- Maple Leaf - She is a little lady who loves to appreciate her everyday life to the fullest. Whenever she finds something interesting, she shares it with others. She has a beautiful voice and has come to fall in love with the music of the world. Whether she's home in the city or at the countryside, she always listens to her hometown's music. She dreams of someday meeting someone who she can share everything with. ----- - Give Nyanza candy candy with this Bundle - Ensure you give her candy candy by downloading this Bundle: You will be able to exchange candy candy for "Giant Candy Cane: This item is included in the Grouch Christmas Outfit bundle./" * JBoss, Home of Professional Open Source. * Copyright 2014, Red Hat, Inc., and individual contributors * as indicated by the @author tags. The Opus Castle Source Code

A: First, you need to change the width of the #main-container element. In your current code, it is 100% (the width of the browser window), which is not enough to contain the contents of the page. I adjusted the width by setting it to 50vh (half the viewport height), which is big enough to push the text down one line. Second, I'm not sure why you're clearing the overflowing text with white-space: nowrap;. I removed it and it should work as expected. Q: How to make a React component non-modal I have a React component that I want to contain a modal. React.createRef() works like a charm here, I can pass in any ref inside of the functional component, and expose it as that. I don't want to close the modal when the component is clicked, so it needs to be open-ended, non-modal. My component looks like this: class RemoveFilterModal extends React.Component { constructor(props) { super(props); this.openModal = React.createRef(); } closeModal(){ this.openModal.current.close(); } render(){ return (

What's new in FootRock:

Selection ~*~Christmas Party at the King’s Hill Hotel~*~ (from the soundtrack “The Kingdom of One’s Own”) As the king and queen drop in, the barkeeps tout new ways to enjoy the spiced wine and one guest suggests a Christmastime music playlist. His proposal excites the party: a mixture of old and new, dark and holiday-friendly songs. This post is an experiment based on the idea of “reimagining” Christmas, to take it out of the snowy house and into the world of the realm. You cannot save Santa, but you can bring the spirit and the joy of the season to your own home. A (touristy!) holiday playlist for the King’s Hill restaurant in Skipton, Yorkshire, UK. Some of these items are podcasts. For a few weeks, I will highlight one of the tracks per week. If you’re in the UK, check the tour dates for King’s Hill. I hope you enjoy this trip around the holiday season. A Christmas Carol ... This is a scene from the first theatrically released adaptation of A Christmas Carol: Many adaptations follow the same path taken by Charles Dickens: Scrooge becomes a more benevolent person. Kingdom Two Crowns, based on the Middle Ages series, does not have a “happy ending,” nor does it read like a classic Charles Dickens story. I am guessing a few of you reading this, will like the game. Most have not heard of it and therefore would not understand. But I am hoping at least a few of you will pick up the free copy—at long last—to explore a new world. I guess that makes me a gambler, but in my world, that’s a good thing. I expect I’ll write a few more words about King’s Hill, a very cool kingdom. If you’re visiting, I hope you discover Christmas in England. Maybe the camaraderie of the Snowdrop Café will help you get a jump start on Christmas preparations for your home. If you’ve played King’s Hill: The Kingdom of Two Crowns, I look forward to your comments in the comment boxes below. Every few months, a new recording comes across my desk. It’s a different kind of sound

Sul Nore is a new cooperative RPG set in a high-fantasy world. You play as 4 unique heroes with a variety of fighting styles, who are trying to save their people from a genocidal dictator. Your group was hired to find and recover the legendary Demon's Phial. You are given a short, randomised dungeon to explore. As you explore, you will find clues that will help you unlock the whereabouts of the Demon's Phial and you must find it in order to save the world. You are the Four Star Generals of Japan, the new team of Spider-Man. With the help of your epic new robots, you must save the world from another alien invasion and root out Doctor Octopus. Make the best use of your hero, Spider-Man's many abilities and your robot allies to take on the numerous armed and dangerous villains and the main baddy, Doctor Octopus. This game is full of charming hand-drawn art, with fully voiced characters and a genuinely surprising story, you will find yourself glued to the screen from the very first minute. Experience the joyful nostalgia of the '80s arcade with an immersive hand-drawn graphic style and an impressive game design that will make you remember the days of the original games. Featuring: - 15 different missions in 2 locales, each level contain a different type of puzzle to solve. - 17 unique characters and 50 moves with different abilities to choose from. - 18 bonus levels with 'ending conditions' to complete. - 4 different endings depending on your choice. - 5 different game modes, Combat, Puzzle, Boss Rush, Arcade and Challenge mode. FINAL FANTASY has always been about players taking command of a diverse group of iconic characters and battling it out in epic arenas. Now, for the first time, players are able to experience FINAL FANTASY as a co-op multiplayer game in FINAL FANTASY XV CO-OP MULTIPLAYER, to be developed by a team of the original FINAL FANTASY developers. Vanguard is set more than 1,000 years after the events of FINAL FANTASY XIII, with the kingdom of Cocoon in its final days. The kingdom of Cocoon has fallen, and the beautiful land of Lucis, which the Cocoonian people once called home, lies in ruin. One lone knight stands ready to fight the evil Narrix Empire. He alone stands against the sadistic
