Abraham Murray Abraham Murray (August 21, 1750 – September 1, 1806) was a lieutenant colonel in the Maryland Line, having been appointed colonel of the 1st Maryland Regiment, a position he held in the War of 1812. Early life and family Murray was born in New London, CT. and attended Phillips Academy in Andover, MA and Harvard College. His son John Murray also entered the U.S. Military as a lieutenant in the War of 1812. In 1793, Abraham Murray married Anne Johnson of Halifax, MA (1770–1815). He had one child who died in childhood, a daughter Anne Elizabeth. Career Murray began his career with the War of 1812 as a lieutenant and aide-de-camp to General Ross, who would be his father-in-law. A second-generation American, Murray was a member of several notable Maryland families. His 1cdb3666d

Q: Laravel 5.4 pagination showing previous paged results Recently, we implemented laravel pagination for first time and its working fine, but when we click next page it shows results which were already shown on previous page. i mean if we have 10 results on page 1 and we click next page it shows results till 9 not 10. i have read this question in stackoverflow but it is not working for me so can anyone help me please? A: Check for unique key try { \$query = Model::query(); } catch (\Doctrine\DBAL\DBALException \$e) { \$query = Model::find(); } if (\$query->count()) { \$q->orWhere('id', '=', (string) \$query->first()->id); } As a result of the recent loss of 47 lives to COVID-19 in Singapore, many have expressed a greater willingness to track the movement of people both in and out of the country. While tracking the movement of people is a critical life-saving function, it also presents a new challenge for those tasked with data collection, who must also take care to collect accurate data. In an attempt to balance these concerns, we are currently conducting a nationwide research project, in which we are requesting participants' movement data through the government's health tracker app, National Electronic Health Transition Authority's (NEHT) new COVID-19 tracker app. To see how participants use the new app, we are conducting a small-scale qualitative study. Here are seven key findings from the study so far: First, most participants in our sample (N=22) did not have any awareness of the existence of the new app. When asked who they would turn to to update their movement status, most said they would contact their employer first. Second, when asked if he or she had made use of the app, participants' responses reflected high-fidelity use. For example, the mean number of rest days was 4.54 out of a maximum of seven, and the minimum number of movements was also high (mean=77
