Mixed Memories is a body-swapping adventure from developer The Melancholy Dojo, and it will be made available on Steam on May 12th, 2017. The game is currently set for release on the Oculus Rift, HTC Vive, Oculus Touch, Oculus Rift CV1 and Windows VR platforms, and the developers are working to get it out on other headsets as well!If you would like to show your support, or want more information, or need to tell us what you would change about the game, or have any general feedback, we would very much appreciate it if you can drop us a line on Facebook here.Mixed Memories combines the role-playing game mechanics from cult classic adventure game series The Longest Journey with the body-swapping mechanics of The Swapper and the social metagame tactics of social-storytelling title Spore. Are you ready for adventure? Your old body has gone missing. You have no memories of it. You are now using an alien body that your DNA can't identify. Together with your new body, you are moving to a new home on the outskirts of town, where you are told you can start a new life. And, that's all you're told, as you're led to a new life with no idea of who you are or where you came from. What is the connection between you and your new body? It's time to find out. Whose body is it? Play a mind-bending detective adventure where your decisions dictate what you will remember and what you will not. Will you find out who you are and why this body is so important, or will you let your new life slip through your fingers... The question is... Are you ready for adventure? Show MoreQ: Telerik ImageButton failing to Bind ImageUrl from Control.Properties.Resources I'm using Telerik's ASP.NET MVC telerik:RadComponents on an MVC5 application. I need to bind a string value, ImageUrl, from an ImageButton and pass that to the RadDataBoundListBox control but for some reason the ImageUrl from the Control.Properties.Resources is not being loaded. The value is binding correctly though, no problems there. View:

Features Key:

- **Over 100 new items**, including weapons, weapon mods, defensive items, orbs, and misc. items.
- PC and MAC.
- Designed for medium to hard level open-world adventures.
- Get a free item pack on Steam! Developed by the creators of Infinity Blade.
- Move and interact with items precisely with Magic Tools 3D, a physically based collision detection engine.
- Some parts of the game are randomly generated. However, the whole game is not a random looter.

About The Heirlooms Item Pack

This is an item pack designed to accompany you throughout your open-world adventure and

feel right at home with the main gameplay.

This item pack contains over 100 new items, and is designed for medium to hard level open-world adventures. To catch up with the rest of the game's items we must answer the question -

Is this item pack for users:

- **Single player:** For players who like to explore the world alone and don't need a full party team.
- **Multiplayer:** For players who like to explore the world with friends with different abilities and tactics.
- **Community:** For players who create, modify, and share builds for long-lasting awesome loot.

I also tried enabling the "Read speech in" settings in the CDT settings but that doesn't seem to work. I'm running eclipse version Luna (4.4.0) with CDT integrated version 7.1.1. Here's a screenshot of what I'm seeing after enabling the "Read speech in" setting: I'm not sure what else I can do to make this happen. Any help is appreciated. A: I ended up enabling it manually by going into the C/C++ perspective and clicking the "CDT/Eclipse" icon and clicking "Add CUDA CUDA/Eclipse d41b202975
