Orphan Age, an open world fantasy MMORPG set on the mysterious, foggy and ominous world of Illyria, has been offline for a long time. The game world has been dormant for an amount of time that is hard to say. There might have been some reasons of the shutdown, maybe the team was disbanding. All we know is that we will never know until this game returns! Based on the update news in the past, the game seems to run smoothly, and new spells, items and mounts seem to have appeared since quite some time. In fact, the number of people still playing the game is increasing, as well as those who reached level 100. As for game content, over one hundred new monsters have been added, not to mention that new spells and items are being added steadily. Some of the popular monsters will be added later in the game, in case you are interested to know. As for gameplay, there will be much known elements from the original Orphan Age, such as six-round battle system and game story. While the core gameplay is like the original Orphan Age, there will be new features added in the game. You will start a new storyline when you reach the decision point in the main story arc. And then, the story will unfold as the new narrative. The game world is an open world. You can freely travel to any areas by creating your own character and choose your own class as well as your route. The world is divided into four main areas and two sub areas. There will be over 120 new monsters, as well as new spells and items in the game, steadily being added. For game content, both new content and spells will be added, as well as new items being added. For instance, Orphan Age Orphan will be a goddess character, and she will be in charge of the entire Illyrian God Empire project. The Goddess of Destruction team will be in charge of a new project on the world of Illyria, and she will lead to that team to reach the mysterious Illyria island by setting the god apocalypse event and the brief of all this dream by the way. The more experience in the game world, the more experience will be added to your Orphan Age, allowing for more new content to appear in the game. As for game content, Orphan Age Online and Orphan Age are both goddess characters and they will also be in charge of the set of events as well as the special

Board Members For more than 40 years, FBA has been a leading supporter of the annual Christmas Benefit concert organized by Dallas Opera and the Newman Club of Dallas. The Newman Club is a nonprofit organization committed to eliminating world hunger through the annual Christmas Benefit Concert. In the eight years since its inception, Newman Club has produced more than 20 benefit concerts and raised more than \$10 million for the Global Hunger Organization of Dallas and Fayetteville. Dallas Opera, in turn, has raised more than \$2 million for the Global Hunger Organization. Board members with an interest in the arts and music are the key to making this event a success. Whether a volunteer, director, or music producer, the FBA board is the life blood of the Newman Club. Kathleen Kohl I have been a member of FBA for more than a decade, and I currently serve as the Board Secretary. I chose to serve on the FBA Board because I realized that there is a large and knowledgeable musical community in Dallas. No matter the type of music, it is an exciting and innovative time in music, and we must keep ourselves current with the latest trends, musical offerings and venues to keep abreast of developments in our musical industry. I am excited to work with my fellow board members as we plan this year's benefit concert, and I look forward to seeing it through. Sophia Albin This is my first time being involved in a Newman Club event, and it was truly a wonderful experience for me. All of the members, as a whole, were fantastic with details and attention to the needs of the attendees, as well as the artists, crew, stagehands and volunteers. It was completely enjoyable for me; in fact, it was way too much fun. There were, of course, many challenges such as weather, scheduling and logistics, but I think it was all a whole lot of fun. I thoroughly enjoyed every aspect of the day, and I am thankful to be part of an organization that made this day possible. I would be happy to volunteer, sponsor or provide information on what stage, production or setting specific activities were involved in the event. Thank you for the opportunity to be a part of something special. Michael Alioto I have been approached as a volunteer multiple times to serve on the National Board of Directors for the Newman Club. I did not know of the Newman Club until joining FBA in 2004 as a volunteer. I thought the Newman Club was

MonsterCare is a management-simulation game in which the player oversees a shelter for neglected and homeless monsters. Starting from a single room in the attic and a one lost monster, the player develops their shelter into an expansive operation, housing multiple monsters with different traits, needs and abilities. As monsters arrive to the shelter, the player is tasked with maintaining their health, happiness and general well-being, and training them in different disciplines. In order for the monsters to "graduate", the player needs to fill adoption contracts, which have specific requirements regarding the monster's qualities: breed, attributes, and training. After completing adoption contracts, the player is rewarded with money and experience points, which can be spent on expanding and improving the shelter: customizing rooms, unlocking new capabilities, automating tasks etc. Some notes: Don't rage at the randomities of level generation - I've changed some defaults to make it more likely to encounter good monsters. Everything is not equally expensive, and the costs of upgrades and improvements depend on monster type, so be sure to click it often. The Monster room is not solely for player interaction. Any monster can "enter" the room at any time, and it is their job to fetch and groom their lost loved ones and wait for them to come home. Features: Support for 4 adopted monsters, with different visual characteristics. Different levels of customization, from basic furniture to complete self-automating spaces. Various play modes, from simulated hunts to exploration. Interactive and reactive boss rooms, that will respond to players' actions. Extensive reports, graphs and statistics. ETU / Savage Worlds: East Texas University is a semi free to play, Sci-Fi, RPG run and encourage SAGAWS

There are a few moving parts to all of this: A file extension, an installer and the actual game. It was pretty simple to get this all going because I was straightening things up after a few years of vacation. After that it was just a matter of getting it all put together.

Highlights

- Custom factions to go along with the group. All characters have access to these custom factions. Fans of science fiction might get a kick out of this. Fans of horror might feel like their eyes are going to pop. I found this to be quite enjoyable. Also, randomly generated settings for missions.
- Integration of Maker with the game.
- Registry Editor allows you to modify registry items to access different features. I found this to be extremely useful.
- We can use 3d Printers to make custom items for the game.
- I've replaced the audio in the game. People may have complained about the lack of sound.&
