Hello, here I have Windows 7 ISO image. I have around 700GB of data on my PC that I want to move to a new laptop. My old laptop is slow compared to my new PC so I need to put the data on the HDD for faster access. I don't have a Windows 10 DVD so I am looking to create an ISO bootable USB.. I need Norton Ghost to create a bootable USB disk so that I don't need to use any other third party program. For the images/ISOs, I need to do a FULL 100% image/ISO if possible. Please feel free to request any other information that you may need. Answer: From your original description, I am assuming that the error message refers to failure in obtaining a bootable CD. I would like to make certain that you do not need to use a third party tool at all. Perhaps a little more information about the type of data that needs to be saved from your system and the requirements that you have regarding the target system would help us to provide a targeted solution to your problem.
