KVRP Command and Control Framework.re: KVRP Command and Control Framework Manually controlling a KVRP probe is a very time consuming and error-prone task. KVRP Command and Control Framework is a tool that automatically takes over this task. It configures the probe, sends the probe to its destination, and controls the probe. KVRP Command and Control Framework has been tested against the following protocol versions: 6.1, 6.3, 7.0, 7.0.2, 7.2 and 8.0. Every probe is configurable regarding which TC-net protocol version it supports, so that it can be used for KVP operations on various KVRP implementations. See the manual of this tool for more information. read more KVRP Command and Control Framework is a tool that automates KVRP probe operations. It configures the probe, sends the probe to its destination, and controls the probe. KVRP Command and Control Framework handles the following types of probes: KVP probe.
