The Shortcut - Internet Explorer Screenshots: The Shortcut - Internet Explorer Screenshot: The Shortcut - Internet Explorer I have been using IE9 for the past few months but it's time for me to switch to Firefox. I have been hearing all the bad luck with IE9 and most of it is true. I started my review by trying to use

Boot to IE and it gets stuck on the blue scrollbar. I downloaded the IE9 32bit version but I still get the same error. I tried to use Boot to Firefox and I was able to download Firefox but it's only 3.6.6. So here is where I am stuck: I downloaded the IE9 32bit build but I only get an "cannot access IE9" error. Will I be able to download any version of Firefox (32/64) for this build? Or

should I go back to my 32bit IE9? Thanks I still cannot find a way to fix this issue. The single solution I came across for this problem

Macintosh or PC with a video output port capable of displaying 24 bit color at at least 24Hz. You will be able to play the game as a windowed mode, but this can only be set using the game's User Interface. Macintosh with an Nvidia 8400M (or better) or ATI Radeon HD 2600 (or better) or Intel HD 3000 or better. Mac OS X 10.6.8 or

later. A DVD-ROM drive. A broadband internet connection. A video driver that supports DirectX 9.0c and OpenGL
