EXA is a VR rhythm game that lets you play music. Compose your own songs, record loops of your performance, and design new instruments in an infinite, virtual-reality space. Turn your personal creativity into music that enriches the world around you. The Game has three primary modes to help you focus and concentrate: EXA-GATE: The "Gate" mode allows you to create and play instruments in a simple, quick, and relaxing way. EXA-COLLABORATOR: The "Collaborator" mode, similar to what is found in the desktop version of the game, allows you to create and design instruments, then share them with other people. EXA-REMIXER: The "Remixer" mode allows you to assemble full EXA performances with other players. Follow a prepared "Tempo" pattern in your head, and link it to a song. Watch it play out as the songs and instruments that play are automatically adjusted.EXA-VR: EXA-VR provides full support for the HTC Vive (with the AudioASP protocol) and Oculus (with SteamVR) in addition to the Oculus Touch controllers. EXA-VR also supports Google Cardboard, even in landscape mode.EXA-SEQUENZER: Sequencer allows you to add or modify notes within loops. Loop playback is synchronous, so the "robot" performer will play the exact notes that you performed.EXA-MOBILE: For mobile devices, EXA-VR provides a new, responsive, touchscreen-based experience, fully integrated with the rest of the game.EXA is available now for HTC Vive (with AudioASP), Google Cardboard, Oculus (with SteamVR) and mobile devices. The Bluewater line offers some of the same qualities as their Trenchwood brethren, with some additional differences. Perhaps most significantly, Bluewater has greater strength and durability than the Trenchwood line. This is due to the fact that Bluewater is blended from aluminum and titanium rather than just steel that Trenchwood is made of. As a result, Bluewater is stronger than Titanium, while giving off a tone that is lighter than that of Aluminum, making it one of the most comfortable and delicate pipes on the market.**

The King requires the help of brave warriors to defeat an immortal necromancer. In this game you will be accompanied by a player from the next generation of knights, meaning your help is guaranteed. What awaits you are tombs of stone temples, which have many rooms and secret entrances, with connected halls. A maze of mysterious necromancy. The game features permanent death. You will enter the dungeons with the most faithful knight (because a way is closed to the door, you will be dead.) The player with whom you entered a dungeon will release you from the dungeon and you will continue the path to defeat the enemy. If you die before the end of the game, your ally will report this to the King and he will find a way for a new knight to enter the dungeon and continue the fight. And the good news: it will be your way, you can save yourself at any time. How to play? Play as a knight and bravely conquer the dungeons. Survive the first encounter with the enemy, you will then have the chance to finish him off. It will be difficult, deadly and cruel, as you can see, you are fighting undead. For as long as you have the courage and desire to survive, you can protect your future. The most important thing to remember: the longer you stay alive, the more you will be stronger. Each player can choose his starting point from several options. They are as follows: - New Game: enter the level without any preparations at all. - Choose weapons: you will receive two weapons at the start of the game. Depending on the choice of weapons (different type), the game plays a little differently. - The weapon: sword, mace, axe or hammer (based on the time of year). The type of weapon you choose will affect the number and size of the enemies encountered in the first levels of the dungeon. - Basic Equipment: each level you will start out with a set of basic equipment items. The choice of items will affect the battle. - Melee weapons: sword, mace, axe or hammer. Each type of weapon has a unique and distinctive combat style. - Spell staves: if the first dungeon has at least one Necromancer, then he will automatically have a spell staff. The purpose of this is to help you through the difficult initial part of the game. - Armor and clothes: each weapon has its own benefits for certain types of armor.
