Amusement through hardship! In Wobbly Jungle, there are surprises for every level. A little bit of advance preparation can save your life, but some of your reactions will be pleasantly surprising. In this game, the roles are reversed: You are the enemy instead of the protagonist, and you are being chased. It's your job to get through the different levels, avoiding enemy traps and beating them. If you're not careful, you'll end up standing in front of the enemies and become their target instead of their hope of triumph! When you start the game, you'll find a paper assignment. This assignment has a good and bad side: The good side of this assignment is that it will tell you which enemies are the easiest and which ones are the hardest. Therefore, you can spare your energy for the more dangerous enemies and save your energy for the easier enemies. If you complete all the missions given in the assignment without missing a turn, then you will receive a gift: a lock of hair that will turn into a snowball. But it's not as easy as that: You still have to complete the assignment correctly in order to acquire the snowball. You have sixty levels: Be ready, have fun and SURVIVE! Appropriately, Petz is something new again. The graphics, effects and sounds of the Petz are actually in the classes of great games like Angry Birds and Cut The Rope. The digital petz is actually a true champion of the entertainment world. Petz stand out from the others as they get to do everything that their owners do. Petz stands up and shakes their paw.
