Interface mGBA now has a new user interface, and a fresh new look. mGBA's interface has been completely rewritten in order to add richer functionality and keep up with the more advanced features available in the latest version of RetroArch. The main new feature is that mGBA now has a modern, widget-based layout and navigation for a more modern user interface experience. mGBA's interface has been completely overhauled. The switch from the old 2-button widget layout to the new 4-button layout is a good example of the new way mGBA's interface has been redesigned. Along with the new layout comes a new navigation system, which allows games to be replayed, and in game settings to be edited and saved. The new game actions are also what makes the game actions slightly quicker for quick and easy access. The new navigation bar includes all of the most often used features such as rewinding a game, cheats, saving/loading a current game state, and game actions. On the top-right of the navigation bar is a settings menu that allows for the user to change the color scheme, enable/disable borders on games, and enable/disable a cheats menu. In game, the navigation bar has a "rewind" button along the top that allows for quick rewinds, while the middle buttons control scrolling, and the bottom buttons are for replaying, skipping, and saving. Along with the new layout comes a new set of buttons, the navigation bar has been redesigned for mGBA, and still maintains a good feel while allowing for more efficient navigation. The settings menu now uses the same settings menu icon as before, but has moved

How do you introduce your character booklets to your players? And should you be? Tribal Invasion: Brain Craving Creatures: Lizards/Giant Lizard, Snaphus, and Dodo. 4th Edition >6 For characters in organized play, the 4th Edition Player's Handbook's character booklet includes information about the character and their background that players need to know about the character, and there are brief description of the character's home of origin, the Settlement, and Adventure Path content that identifies important information about the character. Since these are optional, and many players are not interested in them, the reason for including them is with the hope that the players might find them useful. For Origins, the DM will generally pull about six records from the Chronicle sheet to the players. In combat for example, the DM would roll 6d6 and keep the highest number on his list. For the Settlement and Adventure Path players will get a table or chart at the beginning of the campaign as a brief summary. Orcs Must Die! 3rd Edition >3 The 3rd Edition character booklet has a section at the end called ∏The Peak of Knowledge∏ which includes information on the character∏s home of origin. There are additional sections on topography and settlements in the settlement/adventure path part of the booklet. There is also a page on character creation where the character can list all the skills or feats they have taken. This is where most of these pamphlets get their names from; ∏The Peak of Knowledge∏. Shadowrun Fourth Edition >4 In 4E Third Edition, the character had two booklets: a ∏Player∏s Handbook∏ where they would keep track of their character sheet, and a ∏Character Backround∏ booklet that would be pulled out to add to with information about the character∏s background. 5th Edition >3 In 5E the character booklet is broken into two sections: a record of the character sheet, and another that has a number of tables depending on the type of character. 5e XP System >1 No matter what type of character the player picks
