When we heard that Nokia was preparing to introduce a new all-black Lumia smartphone, we were skeptical that the device would give up any of the features that made the Lumia 830 a great Windows phone. After using the phone for the past two weeks, I can report that there is no reason for anyone to doubt that Nokia is serious about a low-cost, great-looking black Windows phone. Nokia has finally brought the Lumia 830, the company's first budget Windows phone, to the United States and launched the device here. The device is available for preorder on Amazon, Best Buy, AT&T, and Verizon, with those carriers offering monthly plans starting at \$30 for 500 minutes, 100MB of data, and unlimited text and messaging. The company also announced a Lumia 830 flash sale later
