As of this writing, Photoshop CS6 is free, though you'll need a copy of Adobe Creative Suite 6.2 or later. Chapter 1 tells you more about this upgrade in the "Upgrading to Photoshop CS6" section later in this chapter. Adobe Photoshop CS6 is a powerful and sometimes complex program. It uses a graphical user interface (GUI), but it doesn't use the Windows-style point-and-click method of using your mouse to select, drag, and type, as most other programs do. You must use the keyboard to type commands. Photoshop CS6 is quite different from its predecessor, Photoshop CS5. The following sections describe these differences and give you an overview of this powerful program. Setting the Stage The application window in Photoshop CS6 is called the Photoshop Creative Cloud workspace, shown in Figure 9-1. This workspace presents your canvas to you and holds layers and assets for the image you're working on. It has four tabs on the left side, which enable you to work on your image in a few ways: Photoshop: This tab is used to work on your image, save, and create new documents. Photoshop Sketch: This tab allows you to sketch out new designs and ideas. Document: This tab is used to save and create new documents. Layers Panel: This tab provides thumbnail previews of all the layers used in the current document. **Figure 9-1:** The Photoshop Creative Cloud workspace. The Photoshop Creative Cloud workspace is part of the software's Creative Cloud subscription, which enables you to use Photoshop and Photoshop CC — Photoshop Creative Cloud — on multiple computers. Accessing your Creative Cloud account If you have a subscription to Adobe Creative Suite (or one of its higher-end variants), the Creative Cloud workspace works quite well. After you've logged in to your Creative Cloud account (or you just want to try out the program, in case you're feeling uncertain), follow these steps: 1. Choose Adobe Photoshop CS6 from the Adobe Creative Suite 6.2 Library. 2. Click the Creative Cloud tab on the left side of the window and click the Create a New Project button (refer to Figure 9-1). You may be prompted to enter your email address and your name. 3. Click Next. 4. On the next screen, you may be asked to choose the type of document you want to create
