Loc-Kargil movie in hindi torrent download1. Field of the Invention The present invention relates to an image forming apparatus for fixing an image formed on a recording paper. 2. Description of the Related Art In an image forming apparatus for fixing a toner image on a recording paper after transferring the toner image on the recording paper, there is used a fixing device that applies heat and pressure to the toner image. The fixing device includes a pair of rollers to which a heat source is applied. A pressurizing member is pressed against one of the rollers with a predetermined pressure. In the fixing device of this type, to effectively perform fixing, it is preferable that a surface temperature of the fixing roller at the time of fixing and a surface temperature of the pressurizing member is equal to each other (hereinafter, equal to will be abbreviated to "EQ"). In order to keep the surface temperature of the fixing roller at the time of fixing and the surface temperature of the pressurizing member EQ, a surface temperature of the pressurizing member is detected by a temperature sensor in advance, and the heat source is turned off when the surface temperature of the pressurizing member is less than a predetermined temperature. By doing so, a temperature rise in the rollers is suppressed and the temperature of the roller is stabilized. However, when the temperature of the pressurizing member is controlled by the temperature sensor, a rise of the surface temperature of the pressurizing member occurs. That is, when the temperature of the pressurizing member is controlled by the temperature sensor, before the temperature sensor detects the temperature of the pressurizing member, the temperature of the pressurizing member is increased. Due to the temperature increase of the pressurizing member, the surface temperature of the pressurizing member may be higher than the surface temperature of the fixing roller when the temperature of the pressurizing member is controlled by the temperature sensor. In this case, there arises a problem that the surface temperature of the fixing roller is not kept uniform, and a gloss difference is caused in the image fixed on the recording paper. Albums I wanted in 2014, The Best Of 2014: CD Edition Looking back at the year that was has given us a lot of music, much of it really great and even in the category of faves, I've had a hell of a time narrowing the list down to 10. But if I take a guess

The purpose of this study is to elucidate the dehiscence mechanisms of postoperative vascular anastomosis using three-dimensional (3D) imaging. Anastomotic dehiscence is a serious complication after reconstructive surgery, and its dehiscence mechanism has not been fully elucidated. Twelve patients with postoperative vascular anastomotic dehiscence following reconstructive surgery were enrolled in this study. Three-dimensional computed tomography (CT) angiography images were obtained prior to revision surgery. Anastomotic dehiscence was confirmed intraoperatively and the severity was classified on the basis of the dehiscence extent and configuration. After debridement, the 3D-reconstructed vessel anastomosis was inspected for potential dehiscence mechanisms. Fourteen anastomotic defects were identified. A loose suture was found in only one case; in the remainder, the origin of the dehiscence was attributed to either anastomotic insufficiency or inadequate vascular wall apposition. 3D-reconstructed CT angiography is useful in the evaluation of vascular anastomosis.
