FIFA-14 Update 1.4.0.0 From NosTEAM

Comment # 1 of 4 by smallkap Â· 12-22-2012 05:23 AM Hi.

First of all, thanks for creating and working on FIFA 14. Today I downloaded the update and the fix for the server issue and updated the game. I noticed that there is an option where you can "Change World Setting" on the options. I have selected "Interactive Yellow Card System" and I was wondering if there is a description of the system in this option? Thanks! Luis. =====

==== Hello All! ^ Fix for server issue of FIFA14 + update FIFA14 + Update 1.4.0.0 From NosTEAM Comment # 2 of 4 by chux2010 Â· 12-22-2012 06:46 AM Hello, i'm using the FIFA14 game since i have it on Steam. Just now i have read that Update 1.4.0.0 is release, and it can solve some server issues. When this update has been release, what have you made with it? thanks! chux2010 Comment # 3 of 4 by CFVF

Â· 12-22-2012 06:55 AM Well I tried to update 1.4.0.0 today, and it worked fine (first time) But today I update again, and It said update successful and the Anti-Cheat table too. I restart my game, and i have screen like the this. VANILLA FANCY SHADE So, what happen with this update? And why do I have to update twice? I mean, i already have the update, but why I have to update again? I'm confused!

Comment # 4 of 4 by CFVF Â· 12-22-2012 07:15 AM well i tried to do the update and it worked great ^ ^ But when I updated again, It says notification successful and the Anti-Cheat table too. It's the same thing. I have a screen like this VANILLA FANCY SHADE So, What happen with this update?

Added 4 new computer environments with refactored objects. Added possibility to include all game music into a single. Added the In-game HUD that will be available in all major games that support it. Added possibility to have autosave/load configured from a menu option, instead of the default key bindings. Added possibility to have mouse modifiers configured via a menu. Added 3 new options for recording real-time captures as video, as well as 3 new options for video rendering. Added a new option to change the amount of priority each frame should have. Added an option to set camera movement. Added a new input check called Mouselook, to make sure that the mouse is properly configured. Added an option to make fullscreen a windows application. Added a new option to properly pass urls to other applications. Added a new option to have the console always shown. Added two new options for audio playback speed, which should be very useful for those running games with a slow CPU. Added an option to load maps that are stored in a different folder from the games folder. Added more randomization of auto-reloads. Added a bug-fixing update for a fps of over 100. Added the ability to move replays from the photo/video albums to the finished/unfinished/unfinished/re-worked album, if any. Added the ability to copy the currently playing soundtrack

to a data file. Added a bug-fixing update for an issue that could cause the game to fail after a rare crash. Added a new texture to the uniform of the medikit taker. Added two new values for the vsync override option (which allows to disable vsync in half-float settings). Added the ability to have a console for nearly every message, via the Video option. Added a new effect for the spawn system (which will now spawn a number of players for each life bar that is a certain amount above the current score). Added a new option for the player chat window, which can be either text or a text box with the chat history, as well as the ability to allow the player chat history to be logged for analysis.

Added a new effect for the font of the message of the player chat window, which can now have a shadow under it.

Added a new effect for the number of the player chat window, which can now have a solid black border around it.

Added an option to
