

Gallery for 720p Ae Dil Hai Mushkil movie dubbed in hindi Q: setting ViewPager as SpinnerAdapter I've a viewPager and want to set its adapter to SpinnerAdapter and a SpinnerAdapter as its adapter. When I do this spinner shows me the first item as selected and even its Text is

displayed. How can I make the spinner to display its Text instead of showing its default item?

Here is the code for the viewpager: A:

```
On your  
viewpager's  
adapter set onItem  
SelectedListener sp  
inner.setOnItemSel  
ectedListener(new  
OnItemSelectedListener()  
{ @Override  
0cc13bf012
```

A: Whenever I have this experience, the cause is inbound requests, or perhaps some other network problem. I tested the request with postman, and it works fine, returning the same response I would receive with a browser. This is a mystery I'm not familiar with, but at least it's solved. [A
