Here's what the team said about the new features: FIFA 22 gameplay is powered by real-life player movement data collected from actual, high-intensity matches, with players performing impressive, full-speed action. The hyper-realistic results mean that the player's animations look and feel the same on the pitch as they do on the pitch. FIFA 22 includes a new ball physics system that was developed with years of research and hard work by our third party certified Ball physics engineers. This means we have delivered a comfortable and more responsive ball sensation for you and your audience, enabling players to perceive the correct degree of elasticity for the ball when they catch, control and pass. Players can also run with the ball instead of chasing it, which impacts their game considerably. It's the perfect opportunity for a player to be one-on-one with a defender without chasing the ball across the pitch, or even putting your entire body into getting possession of the ball. And FIFA 22 includes a variety of new ball movement control settings that will help you tackle the new ball physics challenges. What we've put into the engine is genuinely best-in-class. We've worked with real-life players, third party certified Ball physics engineers, and our Ball physics certified gameplay engineers to deliver the best on-pitch ball physics in the world. Players run with the ball in FIFA 22 and can run with the ball. In the new Real Player Motion system, players look and behave like they are really playing and experiencing the game naturally. Players run with the ball, use their feet in specific ways and their arms to express themselves in a new and unique way. The engine also makes use of three different animation tools to accurately represent the players on-the-pitch. Every action a player makes is first experimented and analysed on a highly-detailed motion capture suit. Those actions are then converted into animations, which are then placed in a series of animations. This creates a dynamic representation of the player that reacts to the world in a way that is visually convincing. In addition to these new features in FIFA 22, the engine also delivers improvements in other core gameplay mechanics such as defensive anticipation and hold up play as well as improved player tactics, marking and off-ball runs. We've added variable ball physics settings to help you tackle the new ball physics challenges. You can tweak the settings to accommodate the specific game situations

FIFA is a Sports Game. The leading videogame franchise in the world. FIFA in the Sports World FIFA is a part of the Sports world. The FIFA World Cup™ was first introduced in 1930, and, before the FIFA World Cup™ became an annual event, it was every 4 years, for example, in 1934, 1938, and 1950. Today, the FIFA World Cup™ is an annual event that begins and ends in Brazil, and is held every 4 years. Before Brazil's last World Cup™ in 2014, it had been held for 71 years straight. FIFA GOALS in Sport If you are a soccer fan, there are many things to enjoy in the FIFA World Cup™. Whether you love the World Cup™ atmosphere, or watching for your team to win one of the games, or watching for your favorite players to come out and shine, there are many reasons to be glad the World Cup™ is here, and that you can have access to FIFA GOALS when you play in FIFA World Cup™. FIFA GOALS FIFA GOALS are driven by the tactical scenarios in FIFA World Cup™. There are a large number of different scenarios, but only 3 are chosen to be ready to be played from day 1 of the World Cup™. The game starts with Uruguay playing Germany. The regular games are the same as the real games, whether winning or losing, but without the pressure of the World Cup™. The Scenario The Scenario is selected before the start of the World Cup™. If you choose Germany, then the Tactical Scenario is on, no matter what happens in the game. If Uruguay wins, you have no control of which scenario to select, but if Germany wins, the Tactical Scenario on would be Brazil-USA, and for the first game, Uruguay-Germany would be on the scenario. The reason for this is to balance the match experience, when a player with a lot of time on foot, or control of the ball is leading his team, you probably want him to play for a scenario where his control of the ball can lead to goals. FIFA WORLD CUP™ EA SPORTS™ FIFA World Cup™ is the official videogame of the FIFA World Cup™. The EA SPORTS FIFA World Cup™ that you play on the FIFA World Cup™ Fan App with FIFA GOALS is exactly the same FIFA World Cup™ that the bc9d6d6daa
