Pentax still uses the
timer for the "Reverse"
transition. Therefore,
for perfect reversals,
you have to go in
manually and reverse
the video. Pentax
quality is still good. But

it's a shame they don't have that great reverse camera speed which can be adjusted in the settings. Some great video transitions, but a lot of them are unimpressive. I just wish they had a more flexible camera motion as an option. I don't know why they didn't include that since it has been included in other

Pentax lenses. Also, the Megapixel mode is also missing from some of the transitions, making the samples unnecessarily dull.

Really, the only thing that is good about this lens is its camera lens. Good news! Try the free demo for 30 days for \$9
