How to crack captcha on instagrameinstmank.Q: What is the meaning of $[x]=[y]^{\ast}$, in a Hilbert space? Let H be a Hilbert space and $(\mathscr{B}(H), \ast)$ be its C^{\ast} -algebraic dual, i.e. $x^{\ast} \in \mathscr{B}(H)$ iff $\langle x, y \rangle = \langle y, x \rangle$. Why does the following fact hold? For all $x, y \in H$, we have $[x]=[y]^{\ast}$, where $[x]=\{z^{\ast} \in \mathscr{B}(H) \mid \langle x, z \rangle = 0\}$. It may be related to linear independence of Hilbert space, but I can not figure it out. A: $x^{\ast} \in [x]$ iff $\langle x, x^{\ast} \rangle = 0$, and $\langle y, x^{\ast} \rangle = \langle y^{\ast}, x \rangle$ so that $\langle y^{\ast}, y \rangle = 0$. Now interchanging x, y gives $\langle x, y \rangle = 0$, so $[x]=[y]^{\ast}$. The linear independence of H is only required for the above. If H is separable then the only necessary condition is that the x_i are linearly independent. A: The fact that you are considering is what happens in $\ell^1(\mathbb{R})$ and $\ell^{\infty}(\mathbb{R})$. First note that for any $x \in \ell^{\infty}(\mathbb{R})$, $x^{\ast} \in \ell^1(\mathbb{R})$, that is, we need to check that $x \in \ell^{\infty}(\mathbb{R})$ and (x^{\ast})
